

2017-2018 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 19, May 6th, 2018– May 12th, 2018)

Highlights

- In week 19 of 2018, trends for individual preliminary local flu activity indicators were mixed, with the majority of key
 indicators decreasing compared to last week. As a whole, flu intensity (composite indicator) decreased, is low, and is now
 at a similar level as the start of the season.
- Geographic spread and local intensity designation (Click here for definitions) = SPORADIC, LOW
- Local medical facility labs reported 762 tests run with 27 (3.5%) positive results for week 19 of 2018.
- The percentage of ED visits for influenza-like-illness (ILI) was stable, while respiratory symptom visits decreased slightly compared to last week.
- In week 19 of 2018, the trends for all local over-the-counter medication category sales tracked decreased (decrease in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, adult anti-fever, and throat lozenge sales) compared to last week.
- Nationally, influenza activity decreased. Please visit the CDC website for specific information.

Local Flu Activity Dashboard (All data are preliminary and may change as updated reports are received.)

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).

³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are recieved.

⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 19, the preliminary local influenza and influenza-like-Illness (ILI) visit rate to athenaHealth® providers (1.6 per 1,000 visits) decreased compared to the previous week and is slightly below its baseline average for the week (Figure 1). The week 19 percentage of all Emergency Department (ED) visits categorized as ILI was stable compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 19 of 2018, 1.2% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is below the national baseline of 2.2% for week 19.

Laboratory Surveillance

During week 19 of 2018, reporting Franklin County sentinel medical facility laboratories tested 762 specimens, with 27 (3.5%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2017 through week 19 of 2018 is 64,672 with 12,306 (19.0%) positives (8,507 type A, 3,791 type B, 7 type A and B, 1 type unknown).

Nationally in week 19 of 2018, clinical laboratories reported 9,341 specimens tested for influenza viruses, 363 (3.9%) of which were positive (107 type A, 256 type B). Public health laboratories reported testing 268 specimens, 48 of which were positive (13 type A – of which 6 were A(H1N1)pdm09, 6 were H3N2, and 1 was not subtyped; 35 type B – of which 27 were Yamagata lineage, 0 were Victoria lineage, and 8 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 19, Ohio clinical labs reported 80,375 specimens tested for influenza this season thus far. Positive results include: (208) A(H1N1)pdm09; (644) A/H3N2; (11,368) Flu A Not Subtyped, and (4,530) Flu B (through 5/12/18). In week 19, ODH Public Health Lab reported 1,241 specimens tested for influenza from various submitters this season thus far. Positive results include: (105) A(H1N1)pdm09; (683) A/H3N2; (201) Influenza B (through 5/12/18). Please visit the ODH website for more information.

ED Respiratory Visits

In the 19th week of 2018, the percentage of all ED visits categorized as respiratory decreased slightly compared to the percentage seen the previous week and is slightly above its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 19 of 2018, the trends for all local over-the-counter medication category sales tracked decreased (decrease in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, adult anti-fever, and throat lozenge sales) compared to last week.
